

Developed & hosted in France

# Sikker

BY MAILINBLACK

## The digital safe that secures all your passwords

### Secure

Thanks to state-of-the-art encryption of your passwords, we guarantee the protection of your confidential information.

### Share

With shared safes and encrypted links, you can collaborate securely across your organisation.

### Organise

Private life, professional life, no more borders – all your passwords are in one place, organised by category for simplified management.

**Reduce technostress within your organisation too**

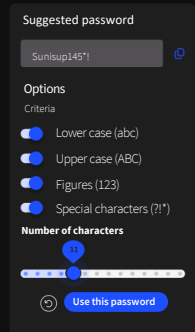

# Why choose Sikker?

## ✓ Anti-phishing protection

Sikker offers a robust defence against phishing. It automatically detects fraudulent websites, preventing login details from being automatically filled in.

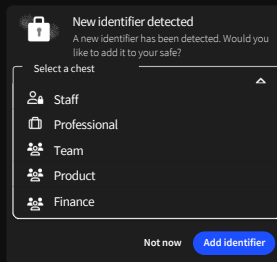

## ✓ Advanced security

The generation of strong passwords, combined with double authentication, is the very essence of our solution, giving you extra protection for all your online access.

## ✓ Smooth navigation

Thanks to our auto-fill system and simplified access to passwords via the mobile application or web extension, you can optimise your employees' online browsing while keeping their data secure.

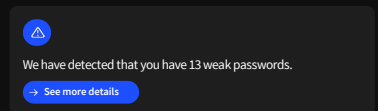

## ✓ Instant protection

Be immediately alerted if your personal data is compromised, so you can react quickly and protect your digital life.

## ✓ Simplified management

Our intuitive dashboard allows administrators to optimise password management by alerting them to the use of passwords by their staff and ensures compliance with security policies for shared safes.

### CLOUD activation

Secure data centre in France (RGPD)  
24/7 supervision & server redundancy  
No installation required

### Installation ON PREMISE

Compliance with your hosting policy  
100% adapted to your infrastructure  
Simplified installation
